(54) DEVICE FOR COMPENSATING INTERFERENCE BETWEEN CROSS POLARIZATION AND RADIO RECEIVER

(57)Abstract:

PURPOSE: To compensate interference between cross polarization even while adopting a set standby system.

CONSTITUTION: The devices 14-1, 14-2 and 24 for compensating the interference between the cross polarization respectively provided in active system receivers 1-1 and 1-2 and a standby system receiver 2 selectively fetch one of the demodulated output of respective demodulators provided in the two receivers different from the belonging receiver by interference wave selection switches 14b-1, 14b-2 and 24b, use it as interference wave signals and compensate the interference between the cross polarization of signals received in the attached receiver.

LEGAL STATUS

[Date of request for examination] 11.01.2000

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3222690

[Date of registration] 17.08.2001

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
